## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 19 and 20, drawn to a receiving beam-forming method, classified in class 367, subclass 103.
  - II. Claims 12-18 and 21-25, drawn to a receiving beam-forming method and apparatus using matched filtering, classified in class 367, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the beam-forming method may be ascertained by using a phase shifting method or discrete fourier transform method. The subcombination has separate utility such as by itself.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. Applicant's election with traverse of claims 9-25 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that there is no serious burden upon the examiner in examining all the claims. This is not found persuasive because as stated above and the previous restriction requirement, a serious burden is shown by the separate status in the art as shown by the different classification and recognized divergent subject matter. However, the specific claims now restricted are changed to the above noted groups.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (703) 306-4161. The examiner can normally be reached on Mon - Fri, 6:30 - 3:00.
